1986 Taxpayer's Survival Program

Filing your taxes is one of life's least pleasant tasks. This program won't make it any more enjoyable, but it will help you do it more easily and more accurately. One of the few things that is less pleasant than filing your taxes is receiving the letter from the I.R.S. that starts out "DEAR TAXPAYER:". By using our program you reduce your chances of receiving that letter substantially. The I.R.S. states that the vast majority of errors that they find are math errors and/or errors made when using the tax tables. The TAXPAYER'S SURVIVAL PROGRAM does those tasks automatically for you and eliminates those mistakes.

In addition the TAXPAYER'S SURVIVAL PROGRAM allows you to store all of your tax form data (1040 and separate schedules) on disk for permanent storage. Or if you elect to do your taxes in several sessions you can store, recall and modify your tax data at will and print your tax data on the IRS Forms.

The TAXPAYER'S SURVIVAL PROGRAM is very easy to use and provides a complete line by line printout for all forms and schedules. It also provides you with a running total of your REFUND (or amount due) as you enter your tax information. This feature allows you to see exactly how an additional deduction might affect your final tax. It also allows you to easily compare optional tax methods (like standard deduction vs. itemized, or trying income averaging) to see which option provides you with the most benefits.

If that isn't enough help we will maintain a telephone HOTLINE through April 15th, 1986. Talk to a trained tax preparer who is ready to help you.

Disc includes the following:
